

Collection for Primary Care Basics

Global Links regularly purchases a number of basic supplies that are vital to quality medical care, and treatment. These items are rarely recovered from medical institutions in the United States, but are in high demand on a continuous basis by the hospitals in Latin America and the Caribbean.

A few example of these needed items include exam lamps, adult and infant scales, exam instruments such as ophthalmoscopes and laryngoscopes and biohazard waste cans for sanitary disposal.

Suggested donation: with \$300 to \$500, Global Links can equip one hospital with the basic primary care supplies it needs to perform diagnostic functions for many years to come.

Global Links 4809 Penn Avenue Pittsburgh, PA 15224 412-361-3424
