Saving and Improving Lives in Uganda

On a training visit to Uganda, doctors with Global Health Educators performed 25 successful surgeries, many of which used sutures donated by Global Links.

In addition to several C-sections, hysterectomies, and laprascopic surgeries, doctors were able to safely amputate the lower leg of Robert, an energetic 12-year old boy suffering from a painful chronic bone disease. The doctors noted that Robert did 'remarkably well' and they are now working to provide him with a prosthetic leg.

Thanks to our financial donors and Program Partners for making stories like this possible.
